## Profile

Communications and Network Engineering student with experience in full-stack web dev, cybersecurity, and agentic systems. I build responsive, secure, and efficient applications with a focus on clean code and robust user experience.

## Education

**•National School of Engineers of Gabès (ENIG)** *Sep 2023 – Jun 2026*
*National Engineering Degree ; Specialization: GCR* Gabès, Tunisia

- **Relevant Coursework:** Network Security, Web Development, Artificial Intelligence, telecommunication, and Embedded Systems.

## Experience

**•Knauf** *Jul 2025 – Aug 2025*
*Full-stack Development Intern* Sidi Bouzid, Tunisia

- Developed a React/Express platform digitizing 3 factory roles, reducing manual reporting time by **60%**.
- Engineered **15+ REST API endpoints** for real-time tracking, improving data retrieval speed by **30%**.
- Deployed automated dashboards and secure UI modules to streamline 100% of client order updates.

## Projects

**•Canserv - AI Healthcare App** *React Native, Google Gemini, Firebase*

- Winner in 3rd place nationally in CSTAM IEEE
- Architected in a team of 2 a cross-platform mobile app using Google Gemini to provide 24/7 AI health support with high response accuracy.
- Participated in the engineering of a computer-vision food scanner providing safety feedback in <**2 seconds** for cancer patients.
- Assisted in securing **100% of user data** using Firebase Authentication and encrypted cloud architecture for healthcare privacy.

**•Intelligent Timetable Generation** *Node.js, React, Genetic Algorithms*

- Developed a Genetic Algorithm engine that reduced schedule generation time by **85%** while eliminating 100% of double-bookings.
- Optimized allocation for **hundreds of academic sessions** (TD/TP), increasing classroom utility rates by **25%**.

**•Resumer-Reviewer-NLP** *Python, Scikit-Learn, Node.js, React*

- Engineered a multi-factor NLP engine to score resumes (**0–100 scale**) and analyze structural integrity.
- Built a keyword extraction module that identifies **critical skill gaps**, improving job match accuracy by **40%**.
- Integrated an AI feedback loop suggesting high-impact verbs to significantly increase ATS conversion rates.

## Social Activity

**•Founder of Securinets ENIG** Sep 2025 – Present

-- Scaled to **20+ members** and coordinated a core team for club operations.
-- Organized and led **10+ technical workshops and CTFs** on ethical hacking and network security.
-- Participated in regional CTFs and collaborative problem-solving sessions.

**•Old member of Children's Council**

-- Collaborated with a **diverse regional council** to advocate for youth policy, enhancing public speaking and decision-making skills.

## Technical Skills

**Languages**: C/C++, Java, JS (ES6+), Python, PHP, SQL | French, English, Arabic
**Dev & AI**: React, Node.js, Express, Firebase, TensorFlow, Keras, OpenCV, Git
**Certificates**: CCNA 1, Generative AI Prompt Engineering

## Extra

Interests include Reverse Engineering, Competitive Chess, and solving algorithmic challenges.
